FOR IMMEDIATE RELEASE

Barclays Expands Suite of iPath® Exchange Traded Notes Linked to US Treasury Futures Indices

Two new ETNs allow investors to express views on the US Treasury yield curve

New York, NY (July 12, 2011) – Barclays Bank PLC announced that today is the first day of trading for the iPath® US Treasury 5-year Bull Exchange Traded Note and the iPath® US Treasury 5-year Bear ETN (each, an “ETN”) on the NYSE Arca stock exchange. The ETNs trade under the ticker symbols DFVL and DFVS, respectively.

Linked to the performance or inverse performance of the Barclays Capital 5Y US Treasury Futures Targeted Exposure Index™ (the “Index”), the ETNs are an expansion of the firm’s current suite of ETNs that provide exposure to fixed income strategies, allowing investors to take a view on whether specific yields will increase or decrease.

“Following the launch of our first fixed income ETNs last year, we have seen increased demand from investors for ways to hedge their portfolios against moves in US Treasury yields,” said Pradeep Jhanjee, Head of Rates Structuring at Barclays Capital.

“The new ETNs allow investors the opportunity to further fine tune their exposures with long and short views on 5-year US Treasury futures,” said Kevin Burke, Head of Investor Solutions at Barclays Capital. “Today’s launch demonstrates our ongoing commitment to offering investors a comprehensive suite of innovative investment products across asset classes.”

iPath® ETNs are designed to provide investors with convenient access to the returns of market benchmarks, less certain costs and investor fees. Subject to the requirements described in the applicable prospectus, the securities can be sold in the secondary market during trading hours at market prices, and may typically be redeemed in at least 50,000 units on a daily basis directly to the Issuer1. The iPath® ETNs are senior, unsecured, unsubordinated debt securities of Barclays Bank PLC.

The prospectuses can be found on EDGAR, the SEC website at: www.sec.gov, as well as on the product website at www.iPathETN.com.

Barclays Bank PLC is the issuer of iPath ETNs and Barclays Capital Inc. is the issuer’s agent. BlackRock’s broker dealer affiliate, BlackRock Fund Distribution Company, engages in the promotion of iPath ETNs to intermediaries.

1 The issuer may, from time to time, in its sole discretion, reduce, in part or in whole, the typical minimum redemption amount of 50,000 units. Any such redemption will be applied on a consistent basis for all holders of units at the time the reduction becomes effective.
About Barclays
Barclays is a major global financial services provider engaged in retail banking, credit cards, corporate and investment banking and wealth management with an extensive international presence in Europe, the Americas, Africa and Asia. With over 300 years of history and expertise in banking, Barclays operates in over 50 countries and employs 147,500 people. Barclays moves, lends, invests and protects money for customers and clients worldwide. For further information about Barclays, please visit our website www.barclays.com.

Tracking error refers to the under/over performance differential of an ETN versus its benchmark index over a given time period, after accounting for the ETN’s fees. One cannot invest directly in an index. An index-linked security shows “path dependency” if its value on any given day cannot be derived from the current and initial values of the underlying index, but instead is dependent on the historical “path” that the index has taken over the calculation period.

An investment in iPath ETNs involves risks, including possible loss of principal. For a description of the main risks see “Risk Factors” in the applicable prospectus.

Barclays Bank PLC has filed a registration statement (including a prospectus) with the SEC for the offering to which this communication relates. Before you invest, you should read the prospectus and other documents Barclays Bank PLC has filed with the SEC for more complete information about the issuer and this offering. You may get these documents for free by visiting www.iPathETN.com or EDGAR on the SEC website at www.sec.gov. Alternatively, Barclays Bank PLC will arrange for Barclays Capital Inc. to send you the prospectus if you request it by calling toll-free 1-877-764-7284, or you may request a copy from any other dealer participating in the offering.

BlackRock Fund Distribution Company assists in the promotion of the iPath ETNs.

iPath ETNs (the “Securities”) are unsecured obligations of Barclays Bank PLC and are not secured debt. The Securities are riskier than ordinary unsecured debt securities and have no principal protection. Risks of investing in the Securities include limited portfolio diversification, trade price fluctuations, uncertain principal repayment, and illiquidity. Investing in the Securities is not equivalent to investing directly in an index or in any particular index components. The investor fee will reduce the amount of your return at maturity or on redemption, and as a result you may receive less than the principal amount of your investment at maturity or upon redemption of your Securities even if the level of the relevant index has increased or decreased (as may be applicable to the particular series of Securities). An investment in iPath ETNs may not be suitable for all investors.

The Securities may be sold throughout the day on the exchange through any brokerage account. There are restrictions on the minimum number of Securities you may redeem directly with the issuer as specified in the applicable prospectus. Commissions may apply and there are tax consequences in the event of sale, redemption or maturity of Securities. Sales in the secondary market may result in significant losses.

For an investment in iPath ETNs linked to a leveraged participation in the performance of the S&P 500 VIX Mid-Term Futures™ Index TR, any decrease in the level of the index will result in a significantly greater decrease in the repayment amount, and you may receive less than your original investment in the ETNs at maturity or upon redemption. If the level of the index decreases sufficiently to trigger an automatic termination event, the Securities will be automatically deemed at the automatic redemption value, which is
calculated after the close of business on the automatic termination date; therefore, the payment you receive on the automatic redemption date may be less than the intraday indicative note value at the time of the automatic termination event. Following the calculation of the automatic redemption value, you will not benefit from any subsequent increase in the index. The payment you receive following an automatic termination event will most likely be significantly less than the principal amount of the Securities and may equal $0. If current levels of market volatility persist, it is highly likely that an automatic termination event will occur. The “participation” value for the Securities, as described in the applicable pricing supplement, is published solely for informational purposes. It is not intended to serve as a basis for determining a price or quotation for the Securities, or as a basis for an offer or solicitation for the purchase, sale, redemption or termination of the Securities.

An investment in iPath ETNs linked to a leveraged participation in the performance of the S&P 500 VIX Mid-Term Futures™ Index TR is subject to risks associated with fluctuations, particularly a decline, in the performance of the index. Because the performance of the index is linked to the CBOE Volatility Index (the “VIX Index”), the performance of the index will depend on many factors including, the level of the S&P 500® Index, the prices of options on the S&P 500® Index, and the level of the VIX Index which may change unpredictably, affecting the value of futures contracts on the VIX Index and, consequently, the level of the index. Additional factors that may contribute to fluctuations in the level of the index include prevailing market prices and forward volatility levels of the U.S. stock markets and the equity securities included in the S&P 500® Index, the prevailing market prices of options on the VIX Index, relevant futures contracts on the VIX Index, or any other financial instruments related to the S&P 500® Index and the VIX Index, interest rates, supply and demand in the listed and over-the-counter equity derivative markets as well as hedging activities in the equity-linked structured product markets. Leverage increases the sensitivity of the Securities to changes in the value of the underlying index. The ratio between the value of the Securities and the notional exposure of each Security to the underlying index will fluctuate during the term of the Securities.

“Standard & Poor’s®, “S&P®”, “S&P 500®”, “Standard & Poor’s 500™”, “S&P 500 VIX Short-Term Futures™” and “S&P 500 VIX Mid-Term Futures™” are trademarks of Standard & Poor’s Financial Services LLC (“S&P”) and have been licensed for use by Barclays Bank PLC. “VIX” is a registered trademark of the Chicago Board Options Exchange, Incorporated (“CBOE”) and has been licensed for use by S&P. The Securities are not sponsored, endorsed, sold or promoted by S&P or the CBOE. S&P and CBOE make no representation, condition or warranty, express or implied, to the owners of the Securities or any member of the public regarding the advisability of investing in securities generally or in the Securities or in the ability of either index to track market performance.
