Barclays announces changes to the quarterly composition of the CIBC Atlas Select MLP Index

CIBC Atlas Select MLP Index (the “Index”) is the underlying index linked to the iPath Select MLP ETNs (ticker: ATMP)

New York, April 06, 2020 – Barclays Bank PLC announced today that during the next quarterly index rebalancing period, which will commence following the close of business on Monday, April 13, 2020 (the “Rebalancing Date”), the following changes will be made to the constituents in the Index.

The following index constituents will be removed from the Index:

- Enable Midstream Partners LP (NYSE: ENBL)
- EQM Midstream Partners LP (NYSE: EQM)
- Western Midstream Partners LP (NYSE: WES)
- Equitrans Midstream Corp (NYSE: ETRN)
- EnLink Midstream LLC (NYSE: ENLC)
- Tallgrass Energy LP (NYSE: TGE)

The following index constituents will be added to the Index:

- Cheniere Energy Partners LP (NYSE: CQP)
- Cheniere Energy Inc (NYSE: LNG)

The iPath Select MLP ETNs (the “ETNs”) are linked to the performance of the Volume-Weighted Average Price (“VWAP”) level of the Index. The ETNs are listed on the CBOE BZX Exchange under the ticker symbol “ATMP.”

An investment in the ETNs involves significant risks, including possible loss of principal, and may not be suitable for all investors. The ETNs are riskier than ordinary unsecured debt securities and have no principal protection. The ETNs are speculative and may exhibit high volatility. The ETNs are also subject to certain investor fees, which will have a negative effect on the value of the ETNs. You are not guaranteed to receive coupon payments on the ETNs. You will receive a coupon payment on a coupon payment date only to the extent that the accrued dividend exceeds the accrued investor fee on the relevant coupon valuation date.

In accordance with the Index’s methodology (as described in the prospectus relating to the ETNs), the Index is rebalanced quarterly. The Index is designed to provide exposure to a basket of midstream US and Canadian master limited partnerships, limited liability companies and corporations that trade on major US exchanges (the “Index Constituents”). The Index Constituents are classified in the GICS® Energy Sector or GICS® Gas Utilities Industry according to the Global Industry Classification Standard® (“GICS”) and meet certain eligibility criteria.

The Index currently includes 15 constituents and cash. The Index Constituents will be rebalanced on a capped, float-adjusted, capitalization-weighted basis across four Index business days starting on the Rebalancing Date.

Constituent additions to and deletions from the Index do not reflect an opinion by Barclays Bank PLC on the investment merits of the respective securities.

The target weights for the top Limited Partnership (“LP”) and General Partnership (“GP”) Index Constituents, effective after the rebalance on the Rebalancing Date, are reported in the table below. For more information regarding how an Index Constituent is classified as a LP or a GP, please see the prospectus relating to the ETNs.

LIMITED PARTNERSHIPS			GENERAL PARTNERSHIPS		
Ticker	Company	Target Weight	Ticker	Company	Target Weight
EPD	Enterprise Products Partners	8.00%	ENB	Enbridge Inc.	4.00%
ET	Energy Transfer LP	8.00%	KMI	Kinder Morgan Inc.	4.00%
MMP	Magellan Midstream Partners	8.00%	OKE	Oneok Inc.	4.00%
PAA	Plains All American Pipeline LP	8.00%	PAGP	Plains GP Holdings	4.00%
MPLX	MPLX LP	8.00%	TRP	TC Energy Corp.	4.00%
CQP	Cheniere Energy Partners LP	8.00%	WMB	Williams Cos Inc.	4.00%
PSXP	Phillips 66 Partners LP	8.00%	LNG	Cheniere Energy Inc	4.00%
TCP	TC Pipelines LP	8.00%

The Index Constituents are selected for inclusion in the Index using the CIBC Select MLP Strategy (the “Strategy”) developed by CIBC Private Wealth Advisors, Inc. (the “Index Selection Agent”). The Strategy dynamically selects a basket of up to 100 Index Constituents based on their long-term credit rating, the portion of their cash flow driven by mid-stream operations and their size as measured by free-float market capitalization and average daily trading value. The Index Selection Agent provides the Index Constituents that are selected by the Strategy to Barclays Bank PLC, as index sponsor.

Selected Risk Considerations

An investment in any ETNs linked to the CIBC Atlas Select MLP Index (the “ETNs”) involves risks. Selected risks are summarized here, but we urge you to read the more detailed explanation of risks described under “Risk Factors” in the applicable prospectus supplement and pricing supplement.

You May Lose Some or All of Your Principal: The ETNs are exposed to any decrease in the Volume Weighted Average Price (“VWAP”) level between the inception date and the applicable valuation date. Additionally, if the VWAP level is insufficient to offset the negative effect of the investor fee and other applicable costs, you will lose some or all of your investment at maturity or upon redemption, even if the VWAP value has increased. Because the ETNs are subject to an investor fee and any other applicable costs, the return on the ETNs will always be lower than the total return on a direct investment in the index components. **The ETNs are riskier than ordinary unsecured debt securities and have no principal protection.**

Credit of Barclays Bank PLC: The ETNs are unsecured debt obligations of the issuer, Barclays Bank PLC, and are not, either directly or indirectly, an obligation of or guaranteed by any third party. Any payment to be made on the ETNs, including any payment at maturity or upon redemption, depends on the ability of Barclays Bank PLC to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of Barclays Bank PLC will affect the market value, if any, of the ETNs prior to maturity or redemption. In addition, in the event Barclays Bank PLC were to default on its obligations, you may not receive any amounts owed to you under the terms of the ETNs.

Issuer Redemption: Barclays Bank PLC will have the right to redeem or “call” the ETNs (in whole but not in part) at its sole discretion and without your consent on any trading day on or after the inception date until and including maturity.

danielle.popper@barclays.com

The Payment on the ETNs is Linked to the VWAP Level, Not to the Closing Level of the Index and Not to the Published Intraday Indicative Value of the ETNs: Your payment at maturity or upon early redemption is linked to the performance of the VWAP level, as compared to the initial VWAP level. Although the VWAP level is intended to track the performance of the Index, the calculation of the VWAP level is different from the calculation of the official closing level of the Index. Therefore, the payment at maturity or early redemption of your ETNs, may be different from the payment you would receive if such payment were determined by reference to the official closing level of the Index.

No Guaranteed Coupon Payments: You are not guaranteed to receive coupon payments on the ETNs. You will receive a coupon payment on a coupon payment date only to the extent that the accrued dividend exceeds the accrued investor fee on the relevant coupon valuation date. The amount of the accrued dividend on any coupon valuation date depends in part on the aggregate cash value of distributions that a reference holder would have been entitled to receive in respect of the index constituents prior to the relevant coupon valuation date.

Market and Volatility Risk: The return on the ETNs is linked to the performance of the VWAP level of the Index which, in turn, is linked to the performance of the master limited partnerships and other securities that are included as index constituents at any time. The prices of the index constituents may change unpredictably and, as a result, affect the level of the Index and the value of your ETNs in unforeseeable ways.

Concentration Risk: The index constituents are companies in the Energy Sector or Gas Utilities Sector, as determined by the GICS® classification system. In addition, many of the index constituents are smaller, non-diversified businesses that are exposed to the risks associated with such businesses, including the lack of capital funding to sustain or grow businesses and potential competition from larger, better financed and more diversified businesses. The ETNs are susceptible to general market fluctuations in the energy and gas MLP market and to volatile increases and decreases in value, as market confidence in, and perceptions regarding the index constituents change. Your investment may therefore carry risks similar to a concentrated securities investment in one industry or sector.

A Trading Market for the ETNs May Not Develop: Although the ETNs are listed on NYSE Arca, a trading market for the ETNs may not develop and the liquidity of the ETNs may be limited, as we are not required to maintain any listing of the ETNs.

Restrictions on the Minimum Number of ETNs and Date Restrictions for Redemptions: You must redeem at least 50,000 ETNs at one time in order to exercise your right to redeem your ETNs on any redemption date. You may only redeem your ETNs on a redemption date if we receive a notice of redemption from you by certain dates and times as set forth in the pricing supplement.

Uncertain Tax Treatment: Significant aspects of the tax treatment of the ETNs may be less favorable than a direct investment in MLPs and are uncertain. You should consult your own tax advisor about your own tax situation.

The ETNs may be sold throughout the day on the exchange through any brokerage account. Commissions may apply and there are tax consequences in the event of sale, redemption or maturity of ETNs.
