Barclays announces waiver to the minimum early redemption size of certain Treasury Futures Index ETNs

New York, September 4, 2018 – Barclays Bank PLC (“Barclays” or the “Issuer”) today announced a waiver to the minimum early redemption size for each series of ETNs specified herein (together, the “ETNs”). Currently, holders of the ETNs are required to redeem at least 20,000 ETNs at one time in order to exercise their right to redeem the ETNs directly with the Issuer. After the close of trading on September 4, 2018 (the “Effective Date”), Barclays will waive the minimum early redemption size so that holders may exercise their right to redeem the applicable ETNs on the redemption date corresponding to each such valuation date with no minimum amount.

The waiver will be in effect as of the close of trading on the Effective Date unless modified by Barclays at its sole discretion. Any future modification, including reducing the term of the waiver or modifying the minimum redemption size, will be applied on a consistent basis for all holders of that series of ETNs at the time such modification becomes effective.

Table 1

ETN Name	ETN Ticker	Underlying Index Name	Underlying Index Ticker	Current minimum early redemption size (# of ETNs)	Reduced minimum early redemption size (# of ETNs)
iPath® US Treasury Steepener ETN	STPP	Barclays Capital US Treasury 2Y/10Y Yield Curve Index	BXIIUSTP	20,000	Zero
iPath® US Treasury Flatteners ETN	FLAT	Barclays Capital US Treasury 2Y/10Y Yield Curve Index	BXIIUSTP	20,000	Zero
iPath® US Treasury 2-year Bull ETN	DTUL	Barclays Capital 2Y US Treasury Futures Targeted Exposure Index	BXIITETU	20,000	Zero
iPath® US Treasury 2-year Bear ETN	DTUS	Barclays Capital 2Y US Treasury Futures Targeted Exposure Index	BXIITETU	20,000	Zero
iPath® US Treasury 5-year Bull ETN	DFVL	Barclays Capital 5Y US Treasury Futures Targeted Exposure Index	BXIITEFV	20,000	Zero
iPath® US Treasury 5-year Bear ETN	DFVS	Barclays Capital 5Y US Treasury Futures Targeted Exposure Index	BXIITEFV	20,000	Zero
iPath® US Treasury 10-year Bull ETN	DTYL	Barclays Capital 10Y US Treasury Futures Targeted Exposure Index	BXIITETY	20,000	Zero

Barclays is a transatlantic consumer and wholesale bank with global reach, offering products and services across personal, corporate and investment banking, credit cards and wealth management, with a strong presence in our two home markets of the UK and the US. With over 325 years of history and expertise in banking, Barclays operates in over 40 countries and employs approximately 85,000 people. Barclays moves, lends, invests and protects money for customers and clients worldwide.

iPath® US Treasury Long Bond Bull ETN	DLBL	Barclays Capital Long-bond US Treasury Futures Targeted Exposure Index	BXIITEUS	20,000	Zero
Barclays Inverse US Treasury Composite ETN	TAPR	Barclays Inverse US Treasury Futures Composite Index	BXIIITA G	20,000	Zero

All of the ETNs trade on the NASDAQ stock exchange.

The obligation of Barclays to accept any early redemption of ETNs, including with the reduced minimum redemption size as specified herein, is subject to the procedures set forth in the section “Specific Terms of the ETNs—Early Redemption Procedures” in the prospectus relating to the ETNs. These procedures include delivering a notice of redemption and signed confirmation to Barclays prior to the relevant valuation date within the time frames set forth in the prospectus and instructing the Depository Trust Company custodian at which the ETNs are held to book and settle a delivery versus payment trade with respect to the ETNs.

The ETNs are riskier than ordinary unsecured debt securities and have no principal protection. The ETNs are unsecured debt obligations of the Issuer and are not, either directly or indirectly, an obligation of or guaranteed by any third party. **An investment in the ETNs involves significant risks, including possible loss of principal, and may not be suitable for all investors.**

The prospectus relating to each series of ETNs can be found on EDGAR, the Securities and Exchange Commission’s website at: www.sec.gov, as well as on the ETN products website at the links listed below for the relevant series:

An investment in the iPath ETNs described herein involves risks. Selected risks are summarized here, but we urge you to read the more detailed explanation of risks described under “Risk Factors” in the applicable prospectus supplement and pricing supplement.

You May Lose Some or All of Your Principal: The ETNs are exposed to any change in the level of the underlying index between the inception date and the applicable valuation date. Additionally, if the level of the underlying index is insufficient to offset the negative effect of the investor fee and other applicable costs, you will lose some or all of your investment at maturity or upon redemption, even if the value of such index level has increased or decreased, as the case may be. Because the ETNs are subject to an investor fee and other applicable costs, the return on the ETNs will always be lower than the total return on a direct investment in the index components. **The ETNs are riskier than ordinary unsecured debt securities and have no principal protection.**

Credit of Barclays Bank PLC: The ETNs are unsecured debt obligations of the Issuer, Barclays Bank PLC, and are not, either directly or indirectly, an obligation of or guaranteed by any third party. Any payment to be made on the ETNs, including any payment at maturity or upon redemption, depends on the ability of Barclays Bank PLC to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of Barclays Bank PLC will affect the market value, if any, of the ETNs prior to maturity or redemption. In addition, in the event Barclays Bank PLC were to default on its obligations, you may not receive any amounts owed to you under the terms of the ETNs.

Market and Volatility Risk: The market value of the ETNs may be influenced by many unpredictable factors and may fluctuate between the date you purchase them and the maturity date or redemption date. You may also sustain a significant loss if you sell your ETNs in the secondary market. Factors that may influence the market value of the ETNs include prevailing market prices of the U.S. stock markets, the index components included in the underlying index, and prevailing market prices of options on such index or any other financial instruments related to such index; and supply and demand for the ETNs, including economic, financial, political, regulatory, geographical or judicial events that affect the level of such index or other financial instruments related to such index.

Trading Market for the ETNs May Not Develop: Although the ETNs are listed on NASDAQ stock exchange, a trading market for the ETNs may not develop and the liquidity of the ETNs may be limited, as we are not required to maintain any listing of the ETNs.

No Interest Payments from the ETNs: You may not receive any interest payments on the ETNs.

Restrictions on the Minimum Number of ETNs and Date Restrictions for Redemptions: Except in the circumstances described above, you must redeem at least the minimum number of ETNs specified in the applicable prospectus at one time in order to exercise your right to redeem your ETNs on any redemption date. You may only redeem your ETNs on a redemption date if we receive a notice of redemption from you by certain

dates and times as set forth in the pricing supplement.

Uncertain Tax Treatment: Significant aspects of the tax treatment of the ETNs are uncertain. You should consult your own tax advisor about your own tax situation.

Risks Specific to "Treasury Futures Index" ETN products

The Slope of the U.S. Treasury Yield Curve May Increase, Decrease or Remain Unchanged Over the Term of Your ETNs: The return on your ETNs is inversely linked to the performance of the underlying index, which inversely corresponds to changes in the underlying U.S. Treasury yield curve. Changes in the underlying U.S. Treasury yield curve are affected by a number of unpredictable factors, and such factors may cause the underlying U.S. Treasury yield curve to increase, decrease or remain unchanged over the term of your ETNs.

There is No Guarantee that the Index Level Will Decrease or Increase by 1.00 Point For Every 0.01% Change in the Level of the Underlying U.S. Treasury Yield Curve. Reasons why this might occur include: market prices for underlying U.S. Treasury bond futures contracts may not capture precisely the underlying changes in the U.S. Treasury yield curve; the index calculation methodology uses approximation; and the underlying U.S. Treasury bond weighting is rebalanced monthly.

Changes in the Value of the Underlying Index. The ETNs apply an index multiplier, the effect of which is to adjust and invert the rate at which the value of the ETNs changes in response to changes in the underlying index level.
